**Toro Takes Trimming to the Next Level  
Great design, easier to use and less hassle with the spool!**

MINNEAPOLIS, MN – We all want a beautifully manicured lawn, but most people don't want to spend the money to have a professional landscape contractor maintain it. Toro is introducing three new trimmers that make it easier to have that great looking yard without spending a lot of extra time, energy or money.

Trimming the areas around your trees and edging the driveway are great ways to complete the look of your lawn. The new Toro 11-inch trimmer, 13-inch trimmer and the 15-inch Trim & Edge all feature a sleek new design and are easier to use right out of the box. There is no need to pull out a screwdriver to assemble any trimmer in the new line. The handle and shield pop into place and the assist handle snaps on - no more struggling with tiny screws. The smoother, solid handles and sturdier shaft allow you to take on the toughest trimming tasks with ease.

The biggest news is Toro's exclusive spool replacement system. If you've ever struggled to get the line spool on and off your trimmer you knew there had to be a better way. Toro has found it. The days of removing the spool, rewinding it and then trying to match up the tabs and snapping the spool into place are over. With Toro's new system you simply pop in a new spool and screw on the cap. It's as easy as replacing the top to your mayonnaise jar.

**Toro 15-inch Trim & Edge**

The Trim & Edge converts from a trimmer to an edger with ease. The dual trigger and auxiliary handle make it possible to simply flip the trimmer and begin edging; no buttons to push, no parts to rotate. The versatile 15-inch Trim & Edge also has variable cutting widths. Set the trimmer at 15-inches while edging, and the wire form on the front of the unit acts as a guide – helping the homeowner edge in a perfectly straight line. When trimming around a flowerbed, or other garden areas, the trimmer can be set at 13-inches and the wire form on the front of the trimmer acts as a vegetation guard (i.e., the line will not extend beyond the wire form).

With 4.2 amps of power you're set to take on the toughest grass. And, Toro's Bump Feed line extending system means you won't need to stop to pull out more line. Simply tap the trimmer on the ground and more line is automatically extended. The Trim & Edge has a suggested retail price of \$39.99

#### **Toro 13-inch Electric Trimmer**

In addition to innovative design features, the new 13-inch trimmer is loaded with 3.9 amps of power. The features and have all increased, but the price hasn't. The 13-inch trimmer has a suggested retail price of \$34.99.

#### **Toro 11-inch Electric Trimmer**

The power has increased on the new 11-inch trimmer as well. 3.5 amps give the trimmer the power to move through taller grass quickly, so you get the job done faster. Suggested retail price for the 11-inch trimmer is \$32.99.

Look for Toro's new electric trimmers next spring at Toro dealers and home centers nationwide. Toro is a leading worldwide provider of outdoor maintenance and beautification products for the home, recreation and commercial landscapes.
