**Introducing the All New Toro® Recycler® Mower  
Big Features, Affordable Pricing**

Get ready for a change of pace from traditional lawn mowers. Toro is rebuilding its steel deck Recycler® mowers from the ground up. And these new machines will change the way consumers look at lawn mowing.

Along with a great new look, the new mowers are loaded with great features. All the new Recycler mower models feature a self-propel system, Toro's 6.5 horsepower *Guaranteed To Start*™ Engine and a 3-in-1 (mulching, side discharge and bagging) cutting system.

The Recyclers also have a new way to mulch. Toro's new patented Atomic Blade is engineered to actually mince grass clippings. Notches in the blade turn the clippings into fine particles, making them virtually invisible on your lawn.

The new deck design has a wider, 22-inch cut that features a front-throw chamber. This unique chamber insures a great quality of cut even in tall grass. This versatile 3-in-1 deck can convert from mulching to side discharge or rear bagging without any tools. The big news is that all this innovation is now very affordable. The Toro High Wheel model #20016 starts at only \$299 (sale price). In addition to all the other great features, the High Wheel model also has a new variable speed front wheel drive system. This system allows the operator to infinitely adjust their speed up to 3.1 miles per hour simply by increasing or decreasing pressure on the engagement bail. And, special 12-inch high rear wheels make this model easy to maneuver. "We're very excited about this price point," says Dave Moe, group marketing manager for Toro walk behind mowers. "We've made the quality mowers Toro is known for more accessible. Now virtually every homeowner can own a Toro."

Toro Recycler® Personal Pace® model #20017 features the Personal Pace® Self-Propel System. "This exclusive Toro technology really makes the mower work for you," says Moe. Personal Pace allows you to choose how fast your mower goes, anywhere from zero to 4.8 miles per hour. It gives you effortless control. Just place your hands on the handle and apply slight pressure. No more handles to grip or levers to push. The Personal Pace mower is priced at an affordable \$359.

For easy starts, the clear choice is model #20018 with the Electric Start System. Just one turn of the key and you're off and mowing. The Electric Start model also features the Personal Pace® Self-Propel System. The Electric Start model is priced at \$399.

Each Recycler model is powered by a 6.5-horsepower Toro GTS® engine. Toro's *Guaranteed to Start* promise means that your new mower will start on the first or second pull for two years, or Toro will fix it for free. The new Recyclers also come with a two-year full warranty. If anything goes wrong with your mower under normal use and maintenance, Toro will fix it for free.

Look for the new Recycler mowers this spring at Toro dealers and Home Depot stores nationwide.

Toro is a leading worldwide provider of outdoor maintenance and beautification products for home, recreation and commercial landscapes.
